

3C Metal is committed to improving the environmental efficiency of our workplaces through energy saving initiatives, waste reduction and by promoting sustainable practices.

### OUR AIM

- ✓ Develop a practical environmental management system to support environmental issues that arise in our workplaces.
- ✓ Inspire employees to adopt environmentally friendly habits, both in and outside of the workplace.
- ✓ Reduce excess waste, water and energy consumption.

#### WHAT

### 3C METAL IS DOING PLEDGE

Pledge to reduce waste, reduce single-use plastics, recycle and save energy in the workplace.

### PROMOTE

Promote sustainable practices by increasing employees' environmental awareness.

### PLAN

Implement policies and procedures that cater for continual improvement of environmental matters.

### PROCURE

Aim to partner with suppliers that offer environmentally sustainable products and services.

#### WHAT

### YOU CAN DO TO HELP REFUSE

Say no to single-use plastic, such as plastic straws and cutlery. Say no to items that will quickly go to a landfill.

### REDUCE

Reduce general waste and reduce consumption of electricity and water where possible.

### REUSE

Use reusable water bottles, cups and containers whenever possible.

### RECYCLE

Recycle plastic bottles, paper, glass, batteries and more.

### REPLANT

Plant trees and replant seeds from fruit and vegetable scraps. Create a compost system for organic waste.
